ELECTION/RESTRICTION

ELECTION/RESTRICTION

- 1.** Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I.** **Claims 1-16**, drawn to a method for identifying tumor characteristics, classified in Class 435, subclass 6.
 - II.** **Claims 17-21**, drawn to an array of nucleic acid polymers, classified in class 436, subclass 518.
- 2.** The inventions are distinct, each from each other

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MEP. § 806.05(h)). In the instant case the product (i.e. the array) can be used in a materially different process of using that product. In addition the array is not required to practice the method recited in Claims 1 and 9.

- 3.** Because these inventions are distinct for the reason(s) given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
